SMB Fraud Defense Click-to-Run™ Solution

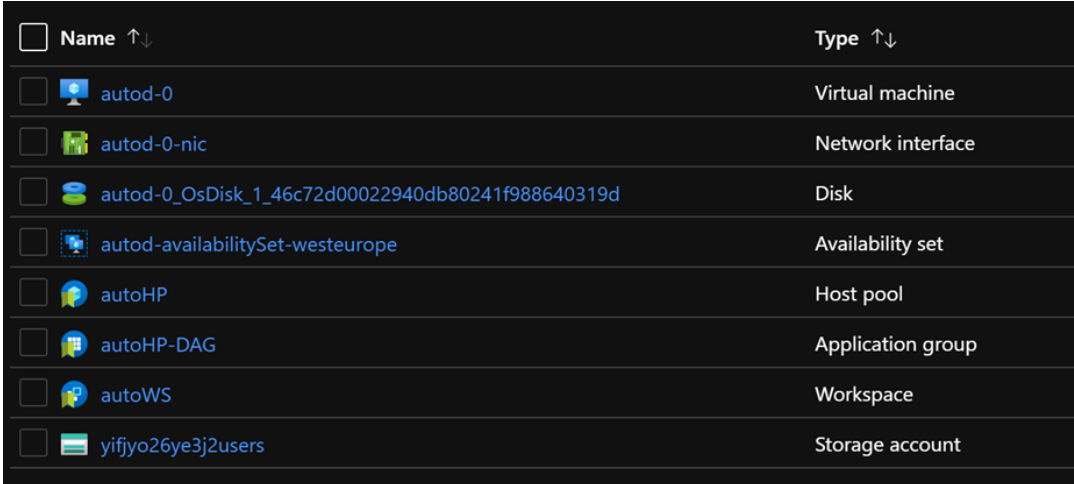

November 2022

Phishing is the biggest SMB threat

TD SYNEX Click-to-Run™ ratkaisut

- Valmiita loppuasiakas-ratkaisuja eri tarkoituksiin
 - Azure – M365 – AWS
 - Kokonaisratkaisuja pitäen sisällään muita ohjelmistotoimijoita kuten Veeam, Veritas, RedHat
- Tavoite ja toimintaperiaate
 - Nopeuttaa ja helpottaa uusien palveluiden käyttöönottoa tai esimerkiksi PoC-projektien käynnistämistä
 - Aina sama standardin mukainen lopputulos, parantaa projektien toistettavuutta sekä kannattavuutta
- Kaikki Click-to-Runit ovat TD SYNEXn asiantuntijoiden suunnittelemaa esi-konfiguroituja, integroituja, testattuja ja dokumentoituja kokonaisratkaisuja
- Osa TD SYNEX kumppanitarjontaa
 - Tilattavissa suoraan StreamOnen kautta
 - Maksuttomia kumppaneille (kulutus ja lisenssit laskutetaan normaalien lisenssiehtojen mukaisesti)

Esimerkki: Azure Virtual Desktop C2R ratkaisun toimittamat Azure-resurssit

Käytännön esimerkki - Azure Virtual Desktop C2R

Microsoft AVD Manual vs. TD SYNEX AVD Click-to-Run

Microsoft WVD Manual Deployment

- Create Azure Tenant & Subscription
- Build Proof of concept
- Create and delegate Azure Admin users
- Review and determine size of host pool / VM sizes
- Create Host Pool or Personal VM's
- Select Session Host Sizing
- Create & Configure Session Hosts
- Create Golden Images
- Create and Publish Remote Apps
- Create Storage Account
- Configure and install FSLogix
- Test Environment and prepare for production
- Configure Azure AD DS
- Connect with existing Domain Controller
- Migrate Data / Application

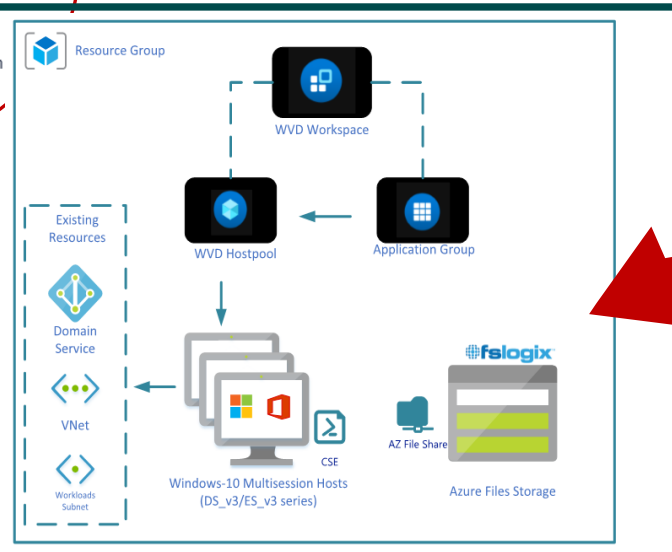

Koodauksesta konfigurointiin Click-to-Run ratkaisun avulla

Tech Data Windows Virtual Desktops

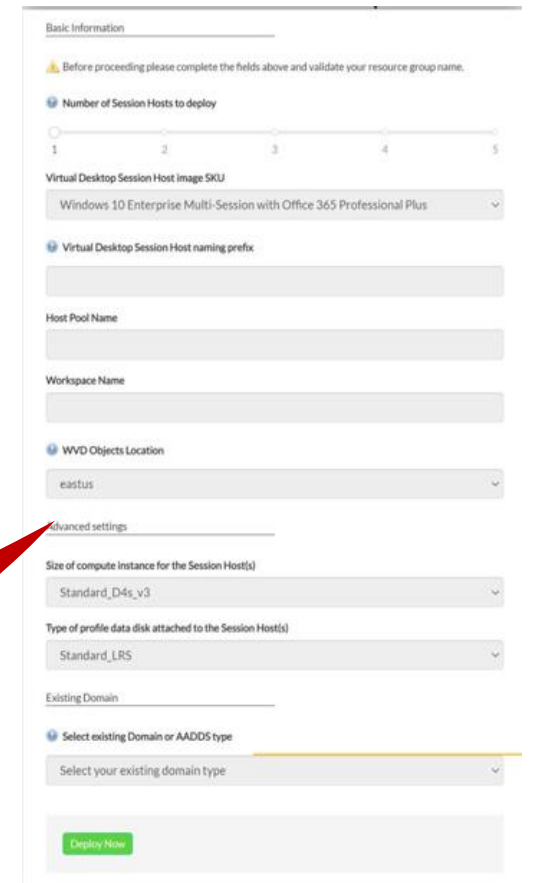

- Find Click to Run Solution and Purchase through SI
- User Input : Choose Individual VMs or Host Pool
- User Input: Select size of VM's
- User Input: Region for Deployment

Post Deployment Steps:

- Choose to Publish Desktop or Apps
- Migrate application, Data, and fine tune for production
- Assign Remote Users through RBAC

Toimintavalmis Azure Virtual Desktop ympäristö

Security & Compliance

SMB Fraud Defense

The most common point of entry for a breach is through the front door using your customer's identity

A large percentage of SMB's today have no Security turned on within their Azure Environment.

This posture allows phishing and other attacks to be more effect. The net result? Cryptojacking and huge bills.

Our SMB Fraud Defense Click-to-Run™ solution includes all the features to protect the entire house.

Identity Protection

- Security Defaults
- Conditional Access
- MFA/3rd party

Policies

- Geo Restrictions
- Block risky log-ins

Budget Control & Alerting

- Create budget thresholds
- Create alert notifications

Deploy the most secure, usable & cost-effective methods

Security Level:
MFA Type

Low:
Per User

Medium:
Security Defaults

High:
Conditional Access

High:
3rd Party

When to use:

- You *cannot* use Security Defaults or Conditional Access
- You *must* allow Legacy Authentication.

- You want ALL users to have MFA
- You are not using Legacy Authentication

- You want granularity and control.
- You already have advanced licenses.

- You have existing investments.
- You have requirements beyond Microsoft Tools.

Cons of Use:

- *Manual maintenance of all users- nobody is automatically enrolled.*

- *No granularity- all or nothing and often conflicts with your Legacy code and tools.*

- *Policy planning is a must!*

- *Additional Costs*
- *Additional Portals*
- *Additional Tools*

Licensing Required:

- None

- None

- Azure AD P1/P2

- 3rd Party MFA Licenses
